CE850 Adjustable Stride Elliptical – Versatile Stride, Maximum Performance

The CE850 Adjustable Stride Elliptical Trainer combines durability, versatility, and comfort to deliver an exceptional workout experience. Designed with a compact, front-drive system, this elliptical allows users to customize their stride from 18" to 24" (46 – 61 cm), simulating a natural walk, jog, or run. Whether targeting endurance, fatburning, or interval training, the CE850 adapts to meet the needs of any fitness level.

The electronically adjustable stride length provides a smooth, natural motion, allowing users to easily shift between walking, jogging, and running for a dynamic, full-body workout. The 30 lb (14 kg) flywheel and dual-rail track system ensure stability and consistency, making the CE850 ideal for Light Commercial settings.

Designed for superior comfort, the CE850 features oversized, cushioned, non-adjustable foot pedals with a 2-degree inversion to reduce joint stress and improve alignment. The narrow 3.8" (9.7 cm) pedal spacing (Q-Factor) promotes a natural stride, minimizing strain on the hips and knees. Multi-position handles with integrated stride and resistance controls provide a comfortable grip while allowing users to make adjustments on the fly.

With 20 levels of magnetic resistance, users can easily fine-tune the intensity to match their fitness goals. The console offers 9 pre-set programs and 1 custom option, catering to a wide variety of workout preferences.

The CE850 is engineered with intuitively positioned hand pulse sensors for instant, accurate heart rate feedback—no repositioning required. For data-driven users, dual Bluetooth and 5kHz compatibility expand the experience by connecting effortlessly to chest straps and third-party monitors. With integrated Bluetooth FTMS, users can also sync seamlessly with leading fitness apps and wearables, transforming basic metrics into actionable training intelligence.

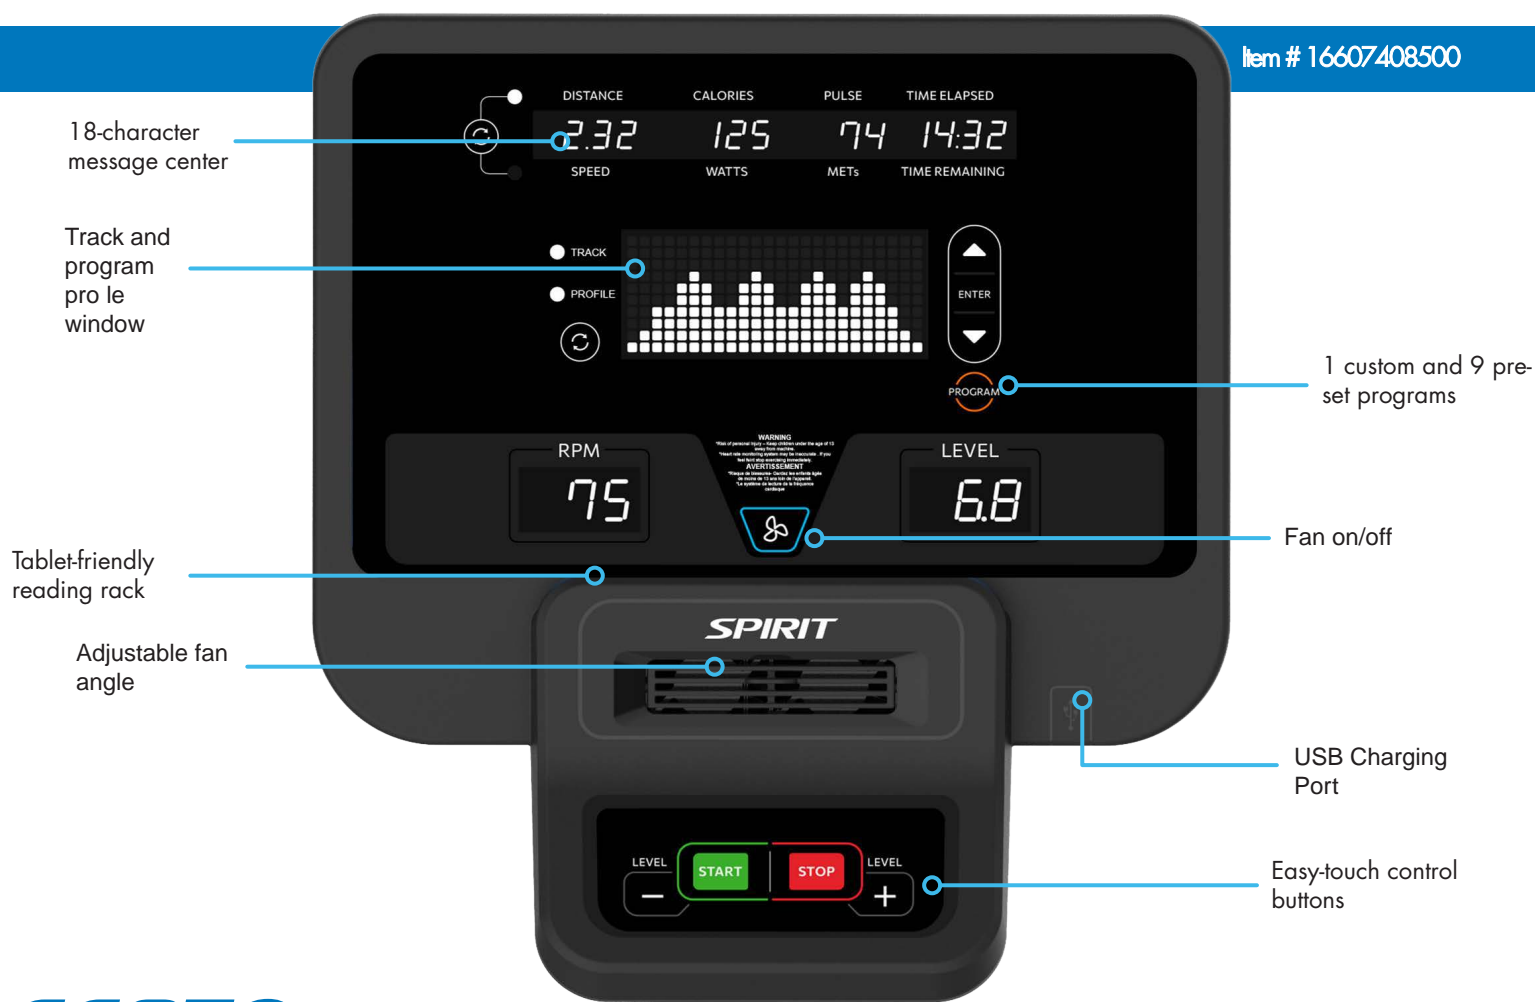

CE850 ELLIPTICAL TRAINER

- Electronically adjustable stride length from 18 to 24 inches (46 - 61 cm) in 0.5 inch (1.3 cm) increments
- Multi-position hand grips with remote resistance and stride controls
- Dual track with shielded concave roller wheel system for superior stability and durability
- 2-degrees of inversion at each foot pedal places the user in an anatomically correct position
- 20 levels of resistance to satisfy the needs of beginners or advanced users
- Adjustable cooling fan, USB charging port, and reading rack
